

NEW!

Introducing the Series 7C7 Compressor Package for FireLock NXT™ devices

Victaulic proudly offers an optional enhancement to the FireLock NXT device line designed to:

- provide a riser-mounted compressor that is preset to the FireLock NXT requirements.
- provide operational air pressure within 30 minutes of discharge, in compliance with NFPA 13
- function right out of the box with a quick, easy installation

The system includes the UL Listed, FM Approved Victaulic Series 757P Air Maintenance Device.

Select either a 1/6HP compressor for a 400 gallon system or a 1/3HP system for a 750 gallon system.

Available October 1, 2007 for all FireLock NXT systems, from 1 ½" – 8".

Combine with the Victaulic Vic-Quick riser, which includes preset pressure switches, for the most convenience and time-savings!
