

EnviScreen

Building Safety System

Is one system against many threats

Risk of terrorist activity, chemical accidents and fires cause potential threat to the safety of buildings with high population or high security level. With the EnviScreen multisensor system, it is easy to control the safety of building or building complex including underground facilities due to its versatile communication options, including wireless, and real-time operation principle.

Guarantees CBRN Preparedness

EnviScreen utilizes state-of-art chemical (both TICs and CWAs) biological and radiological/nuclear (CBRN) detection technologies. System includes true real-time detection of CBRN threat as well as sophisticated simulation and training features.

Ensures Correct Emergency Management

Real-time air quality and ventilation air flow monitoring together with outside meteorological measurements enable correct and fast ventilation, manually or automatically. Online emergency instructions guide and support emergency managers to make correct decisions and action during critical time window.

Is Used to Protect:

- Governmental Buildings
- Airports
- Shopping Centers
- Shelters
- Other high security level buildings

EnviScreen

Building Safety System

Systems Integrations

- CCTV
- Fire and Smoke Detection
- Ventilation Control
- Access Control
