## Software - Lite

EnviScreen Lite is a GIS system designed for chemical detection and monitoring based on real-time information produced by Envionics chemical detectors. This software enables an easy-to-use interface that provides the operator with high level of situational awareness. EnviScreen Lite integrates the chemical detectors on field as complete monitoring system.

### **Provides Situational Awareness**

With a single look at the computer screen, you have full situational awareness of any incident. Graphic user interface can be based on any full colour map(s) or picture(s) provided by the operator. EnviScreen Basic has versatile management tools for user interface configuration, including sensor symbol editing, windowing, zooming etc.

### **Enables Chemical Detection Networks**

With EnviScreen Lite it is possible to create versatile and novel networks of all types of Envionics chemical detectors. Data communication can be wireless or hardwired.

### **Simulation and Training**

Envionics chemical detectors connected to the EnviScreen system can be simulated at any time. This enables simulation of different scenarios and provides versatile training features.

# EnviScreen

## Software - Lite

### Applications:

- Chemical Monitoring Systems
- Building Safety Systems
- Naval Applications
- Area Monitoring Systems
- Chemical Warehouse Safety Monitoring

### Key Features:

- Measurement Data Logging
- Event Data Logging
- User Level Management
- Map Handling
- Device Handling
- Symbol Management
- Emergency Instructions
- Simulation and Training Mode
- Supports LAN/WLAN TCP/IP, serial RS232/485/422, GSM and TETRA communication

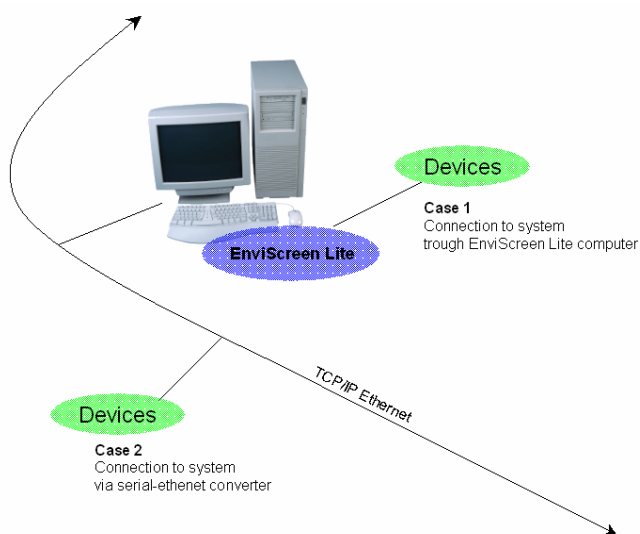

### Support for Sensors and Devices:

#### Chemical Detectors:

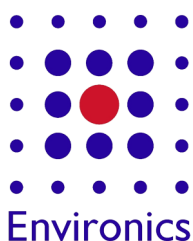

- ChemPro®FX
- ChemPro®100
- M90-D1-C / M90-AKU

#### Data Processing Units:

- M90-CLU41
- M90-CLU81
- Master Module

*Time does matter. We are ready for that.*
